

DEEPAK GAJULA

DevOps Engineer | AWS Cloud | Kubernetes | CI/CD Automation | Infrastructure as Code

Hyderabad, India • +91 9381078088 • deepakgajula15@gmail.com • [linkedin.com/in/gajula-deepak/](https://www.linkedin.com/in/gajula-deepak/)

AWS DevOps Engineer with **nearly 4 years** of experience designing, automating, and managing cloud infrastructure using **AWS, Kubernetes (EKS), Terraform, Docker, Jenkins**, and **GitHub Actions**. Proven track record building CI/CD pipelines and Infrastructure as Code (IaC) while managing **25+ microservices** at **99.9% availability**. Recognized for optimizing Docker images by up to **60%** and delivering secure, scalable cloud solutions.

AREAS OF EXPERTISE

AWS Cloud Infrastructure (EKS, ECS, EC2, VPC, IAM, S3, ECR, RDS, Lambda, CloudWatch, KMS, Secrets Manager, SSM Parameter Store) | Kubernetes & Helm | Docker & Containerization | CI/CD Pipeline Engineering | GitHub Actions | Jenkins Shared Libraries | Terraform IaC (Modules, Remote State, Workspaces) | Ansible | Blue/Green & Rolling Deployments | Kubernetes RBAC | AWS Networking | DevSecOps (SonarQube, Veracode) | Prometheus & Grafana | ELK Stack | Bash & Python | Linux Administration | Git & GitHub | Agile/Scrum

KEY ACHIEVEMENTS

- **CI/CD Automation at Scale:** Engineered **Jenkins Shared Library** pipelines (Build → Scan → Test → Package → Deploy) with GitHub Webhooks — cut build trigger time to **under 30 seconds** across **25+ microservices**, eliminating manual release intervention.
- **Kubernetes Platform Reliability:** Sustained **99.9% uptime** on production EKS clusters (10–25 microservices) via **Blue/Green deployments**, autoscaling tuning, and probe optimization — improving stability by **40%** while cutting Docker image size by **60%** through multi-stage builds.
- **Infrastructure Provisioning Speed:** Reduced provisioning time by **70%** across DEV, QA, and PROD by standardizing AWS infrastructure with reusable **Terraform** modules, remote state (S3 + DynamoDB), and **Ansible** — cutting environment inconsistencies by 60%.
- **Security & Zero Vulnerabilities:** Maintained zero high/critical vulnerabilities for **6+ consecutive months** by integrating **SonarQube, Veracode**, Secrets Manager rotation, and ECR scanning into CI/CD; implemented Kubernetes **RBAC** across 10+ namespaces.

PROFESSIONAL EXPERIENCE

COGNIZANT

Associate (DevOps Engineer)

Mar 2026 – Present

Hyderabad, India

Projects: Buzz Online Blending Application | Pearson Education

Tech Stack: AWS EKS, ECS, EC2, S3, IAM, VPC, Secrets Manager, Lambda, Helm, Jenkins, GitHub Actions, Docker, Terraform, Ansible, SonarQube, Veracode, Prometheus, Grafana, Git

- **Manage and support** production **AWS EKS** platforms across 2 concurrent projects, maintaining high platform availability post-promotion by implementing IAM least-privilege and Secrets Manager credential rotation across all environments.
- Standardizing **GitHub Actions** CI/CD pipelines and security compliance controls across both projects, coordinating with development teams to align deployment cadences — targeting full pipeline parity across DEV, QA, and PROD by Q3 2026.
- Contributing to security posture reviews across EKS namespaces by implementing Kubernetes **RBAC** policies and supporting **IAM** access audits, while supporting Helm chart upgrades and cluster maintenance for ongoing platform reliability.

COGNIZANT

Programmer Analyst (DevOps Engineer)

Oct 2023 – Mar 2026

Hyderabad, India

Project: Buzz Online Blending Application

Tech Stack: AWS EKS, ECS, EC2, S3, IAM, VPC, CloudWatch, Secrets Manager, ECR, NACLs, Load Balancers, Helm, Jenkins, GitHub Actions, Docker, SonarQube, Veracode, Prometheus, Grafana, Git, GitHub

- Reduced **Docker image size by 60%** across 25+ microservices using multi-stage build techniques, deploying optimized workloads on EKS via **Helm** with 10+ deployments, ingress rules, and autoscaling policies — improving deployment reliability by 30–40%.
- Sustained **99.9% uptime** on production EKS clusters (10–25 microservices) through **Blue/Green deployments**, rolling updates, and probe optimization — improving application stability by **40%** with instant rollback and zero-downtime releases.
- Built and maintained **Jenkins Shared Library** CI/CD pipelines (Build→Scan→Test→Package→Deploy) integrating **SonarQube**, **Veracode**, and ECR image scanning; integrated GitHub Webhooks and **GitHub Actions** to cut build trigger latency to **under 30 seconds** across 25+ microservices.
- Maintained **zero high/critical vulnerabilities for 6+ months** by implementing Kubernetes **RBAC** across 10+ namespaces, configuring IAM roles for secure EBS/EFS access, and integrating Secrets Manager rotation into CI/CD workflows.
- Cut resource over-provisioning by **~30%** through autoscaling tuning and cluster event analysis; designed Kubernetes observability using **Prometheus** and **Grafana** to reduce mean time to detect (MTTD) incidents.

COGNIZANT

Programmer Analyst Trainee (DevOps Engineer)

Oct 2022 – Oct 2023

Hyderabad, India

Project: Pearson Education

Tech Stack: Terraform (Modules, Remote State, Workspaces), Ansible, AWS EC2, S3, RDS, VPC, IAM, Secrets Manager, NACLs, Load Balancers, Linux (RHEL/Ubuntu), Bash, Python, Git, GitHub

- Reduced environment provisioning time by **70%** by standardizing AWS infrastructure using reusable **Terraform** modules, tfvars, and remote state (S3 + DynamoDB) with state locking and drift detection across DEV, QA, and PROD — cutting environment inconsistencies by **60%**.
- Automated operational workflows using **Bash** and **Python** for monitoring, disk cleanup, and log rotation — reducing manual effort by **40%**; administered **Linux** systems (RHEL/Ubuntu), cutting recurring operational issues by 25%.

ADDITIONAL SKILLS

Cloud Platform: AWS – EC2, EKS, ECS, S3, RDS, IAM, VPC, ECR, Route53, EBS, EFS, CloudWatch, Lambda, Secrets Manager, SSM Parameter Store, Auto Scaling

Networking: VPC, Subnets, Security Groups, NACLs, Load Balancers, Route53

Containerization: Docker, Kubernetes (EKS, ECS), Helm, Docker Compose, Multi-stage Docker Builds

IaC & Config Mgmt: Terraform (Modules, Remote State, Workspaces, S3/DynamoDB, tfvars, Drift Management), Ansible

CI/CD & Deployment: Jenkins, Jenkins Shared Libraries, GitHub Actions, GitHub Webhooks, Blue/Green Deployments, Rolling Updates, CI/CD Best Practices

Security: SonarQube, Veracode, ECR Image Scanning, IAM Policies, KMS, Secrets Manager, Kubernetes RBAC, SSM Parameter Store, DevSecOps

Monitoring: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch

Scripting & SCM: Bash, Python, Shell Scripting, Git, GitHub, Feature Branching, Pull Requests

OS & Databases: Linux (RHEL, Ubuntu), Windows | MySQL, RDS

EDUCATION

ANURAG GROUP OF INSTITUTIONS

2018 – 2022

Bachelor of Technology – Mechanical Engineering | Hyderabad, India
